Robofy

AI AGENTS PLATFORM FOR AGENCIES

Your Clients Deserve More Than a Chatbot. Give Them an AI Agent.

Deploy white-label AI agents that understand your clients' businesses, capture and qualify leads in real-time, and deliver measurable outcomes — all under your brand, with zero technical overhead.

✓ GDPR Compliant   ✓ 99.9% Uptime SLA   ✓ 50+ Languages   ✓ White-Label Ready

The Problem We Solve

❌ Old-Generation Chatbots

Businesses Are Losing Leads Right Now

- ✗ Scripted responses that can't handle real questions
- ✗ No lead qualification - hot prospects treated like FAQs
- ✗ No memory or context across a conversation
- ✗ Cannot integrate with CRM or take any action
- ✗ Frustrates customers, damages brand trust

✅ AI Agents

How Our Platform Changes the Outcome

- ✓ Trained on your client's actual business content
- ✓ Qualifies and routes leads autonomously, 24/7
- ✓ Maintains full conversation context across sessions
- ✓ Connects with CRM, email, WhatsApp, and more
- ✓ Delights customers with fast, accurate, on-brand answers

The AI Evolution Timeline - Where We Are Now

2024
Basic AI Chatbots
Rule-based logic. Scripted responses that fail on complex queries.

2025
AI Automation
Workflow triggers & basic task automation. Better, but reactive.

NOW (2026)
Autonomous Agents
Real-time qualification, proactive decisions, CRM automation.

FUTURE
The "AI Divide"
Agencies that don't offer AI Agents will rapidly lose clients to those who do.

Traditional Chatbots vs. AI Agents — Side by Side

Dimension	❌ Traditional Chatbot	✅ Our AI Agent
Response Type	Scripted, keyword-matched	Contextual, conversational, intelligent
Business Knowledge	Static FAQ content only	Trained on full website, docs & knowledge base
Lead Handling	Collects email, nothing more	Qualifies intent, scores, and routes leads in real-time
Languages	One or two, manual setup	50+ languages, automatic detection
Integrations	None or very limited	WhatsApp, CRM, Zapier, email, Slack, and more
Accuracy / Hallucinations	Frequent wrong answers	Zero hallucination — only answers from your content
White-Label	Never	Fully — your brand, your domain, your pricing

How It Works — 5 Simple Steps

1 **Connect Content**
Upload docs, paste website URL, or sync knowledge base

2 **Train the AI**
AI indexes and learns your client's business in minutes

3 **Brand & Deploy**
Apply your colours and logo — embed with one line of code

4 **Engage & Convert**
Agent handles conversations, captures and qualifies leads

5 **Review & Improve**
Dashboard analytics and sentiment scores drive continuous improvement

Core Platform Capabilities

Deep Context Understanding

The AI is trained exclusively on your client's content — website pages, PDFs, FAQs, and more — so every answer is accurate, on-brand, and specific to that business.

- Auto-crawls and re-indexes website changes (daily/weekly/monthly)
- Supports PDF, Word docs, sitemaps, and direct URLs
- No hallucinations — refuses to answer outside trained scope

Intelligent Lead Generation

Goes far beyond collecting an email address. The agent understands visitor intent, asks smart qualifying questions, and routes high-value prospects to the right team — automatically.

- Real-time lead scoring and intent detection
- Automated handoff to CRM or human agent
- Available 24/7 — never misses a lead, even after hours

Seamless Integrations

Connect instantly with the tools your clients already use. Whether it's their CRM, e-commerce platform, or messaging app.

- WordPress, Shopify, Wix, WooCommerce
- WhatsApp Business API (Meta-verified), Email
- Zapier, HubSpot, Slack, and open API/Webhooks

White-Label Ready

The entire platform runs under your agency's identity. Custom domain, custom branding, custom pricing. Your clients never see the underlying technology.

- Custom domain and full UI branding
- Multi-seat sub-user management for each client
- Your margin, your pricing, your recurring revenue

Simple, Transparent Agency Pricing

All plans include a white-label panel, GDPR compliance, sentiment analysis, Zapier integration, and WhatsApp (self-serve). No setup fees. Cancel anytime.

Enterprise AI Agent Platform: Architecture Summary

What is Robofy.ai? Robofy.ai is a business AI platform that lets companies deploy intelligent chatbots and AI agents - on their website or WhatsApp - that can actually understand your business, answer questions, and handle customer interactions.

Technology Stack

Frontend Web App: Built on modern Next.js architecture.

Embedded Chatbot: Powered by the high-performance Vercel AI SDK.

WhatsApp Integration: Official Meta WhatsApp Business API - fully verified, compliant integration.

Backend & Scalability

Backend: C# (.NET) for enterprise-grade stability.

Scaling: AWS Lambda - the platform scales up and down automatically to handle traffic spikes.

Databases: AWS RDS & DynamoDB for structured and high-speed data retrieval.

AI & Knowledge Engine

AI Model: Google Gemini - one of the most capable large language models available today.

Knowledge Retrieval: Google File Search RAG - the AI searches only your business's documents.

Privacy: Your data is never used to train AI models for other companies.

Security & Cloud Storage

File Storage: AWS S3 - industry-standard secure cloud storage.

Encryption: All files are encrypted using AES-256 protocols.

Login & Access: Amazon Cognito handles user authentication with role-based permissions.
